POLYURETHANE SPARE PARTS FOR SLURRY PUMPS

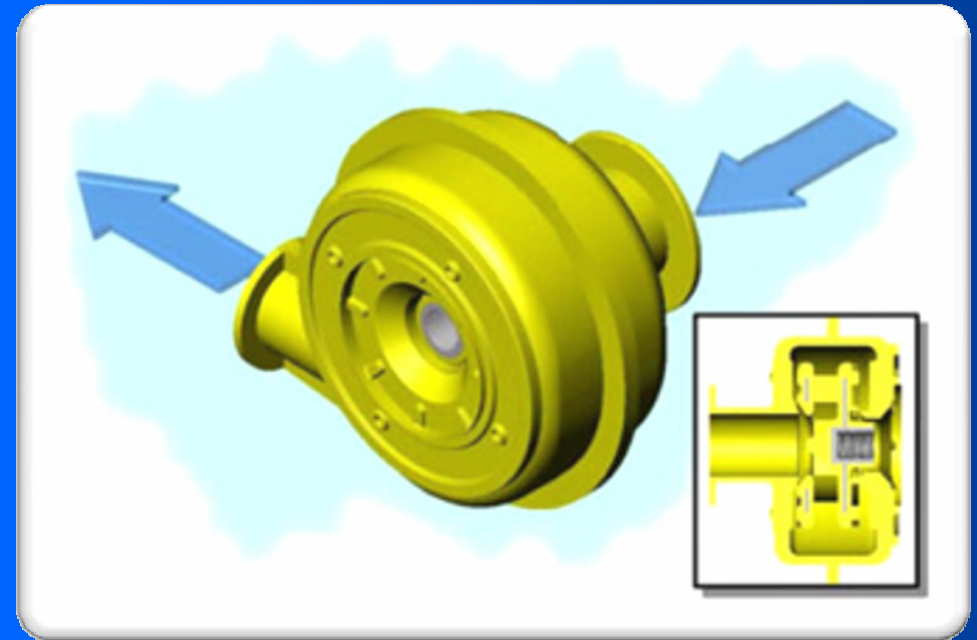

Do you apply Elastomer impellers and liners in your slurry or sand pumps?

Would you like to increase the Wear Life of These parts and definitively reduce the number of production stops and maintenance operations?

We have what fits your requirements!

*We started testing our **ABS** Polyurethane in Pump Lining at the beginning of 90s and have noticed that with the right hardness - usually from 65 Shore A to 75 Shore A - our impellers and side liners lick even the most famous and reputed competitors.*

*The Wear life of our parts is always warranted to be longer than that of the competitors in a range **from 25% to 75%**.*

POLYURETHANE SPARE PARTS FOR FLOTATION CELLS

PT ABS INDONESIA manufactures and supplies a large range of Polyurethane Impellers, Dispersers & Diffusers and other related spare parts for flotation cells.

The great abrasion and corrosion resistance and the excellent resilience of our ABS Polyurethane permits our parts to wear definitely longer than any competing products in every processing application (gold, copper, phosphate, silica, fluorite...)

Documented tests demonstrate that our Impellers and Diffusers minimally wear 200% - 300% longer than the original Rubber items.

When comparing our parts to others lined with Polyurethane it is noticeable a longer wear life of our products of 50% or more.

Here is our available product range:

FLOTATION IMPELLERS

POLYURETHANE VULCANISED LINING AND MOULDED LININGS FOR HYDROCYCLONES

Our polyurethane vulcanized linings and moulded liners are excellent to prevent wear and abrasion effects on Hydro Cyclones.

The combined construction of vulcanized linings and moulded liners offers our customers the total satisfaction of their installation requirements and an extreme versatility in application.

Besides these products boast the following qualities:

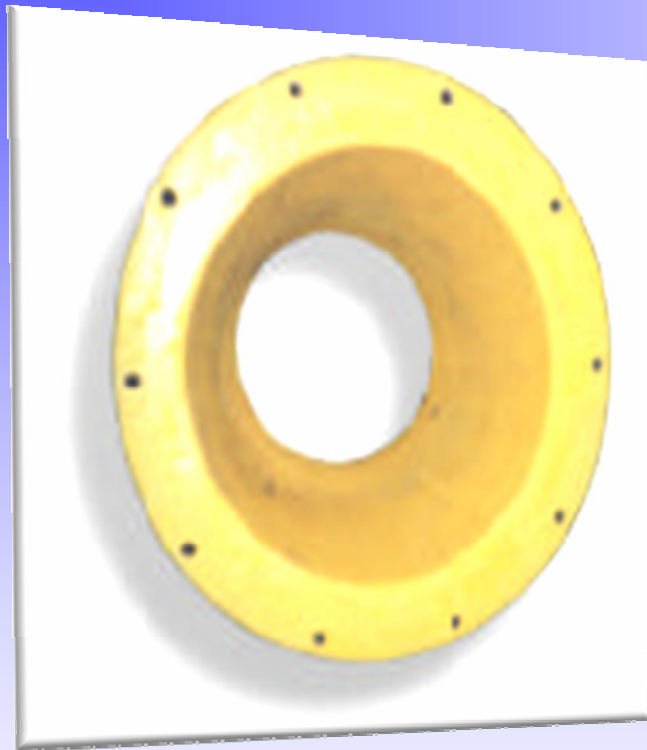

- Superior abrasion resistance and consequent long wear life.*
- Custom construction.*
- Lightweight construction for fast and easy installation.*
- Better cost effectiveness than rubber and ceramic liners.*
- Unlimited application*

VULCANISED LININGS

MOULDED LINERS

We leave our customers the choice of the construction method (vulcanizing or moulding) even if we usually suggest to utilize our vulcanized linings because they need less application of polyurethane and consequently they offer cheaper prices.
